

STORAGE AND SERVICE LIFE

Resin-bonded grinding tools need to be consumed within three years from production.

The expiry date is printed on the metal ring around the bore. The expiry date is indicated in Month and Year. For example grinding tools with the mark „V01/2015“ must be consumed by January 2015.

Grinding tools are breakable therefore they need to be transported, stored and handled with care. Until consumption please store them in a frost free and dry place in their original packaging. Use shelves or racks for storage.
